Teknologi for et bedre samfunn

Med hjertet på Internett

Sikkerhet i det medisinske IoT

Marie Moe, PhD, Forsker ved SINTEF IKT, Systemutvikling og sikkerhet

@MarieGMoe

@SINTEF_Infosec

NETT I HJERTET

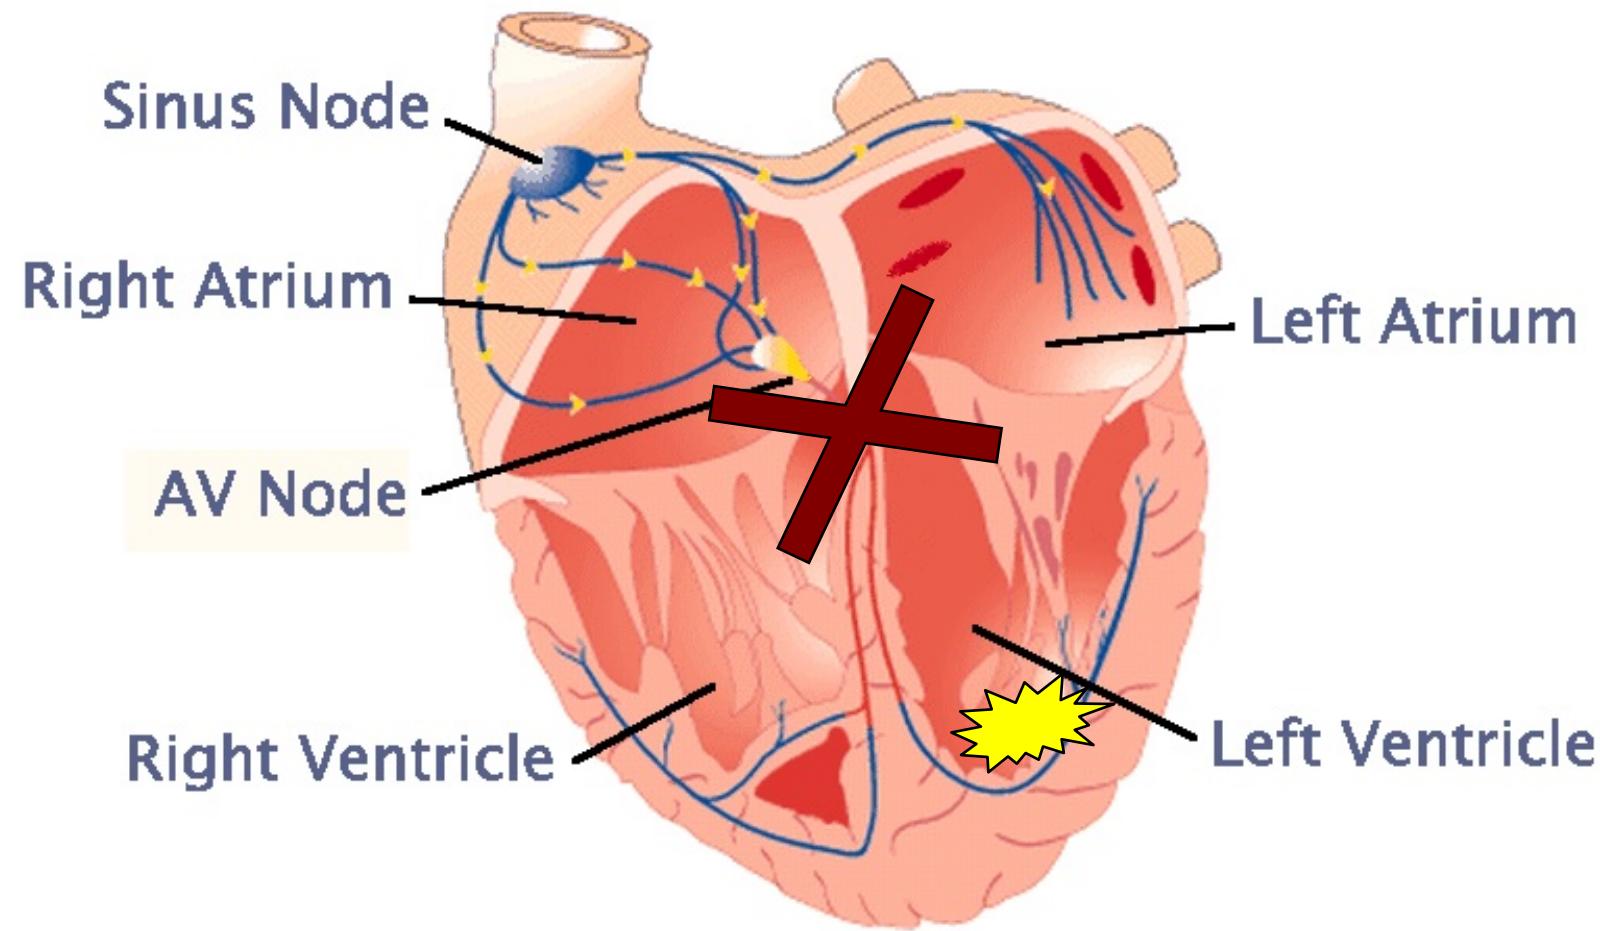

Da sikkerhetseksperten Marie Moe (37) fikk hjerteproblemer, oppdaget hun at det er mulig å hake livskritiske, medisinske apparater som pacemakere, morfinpumper og insulinutstyr.

Det "medisinske Internet of Things"

Når sensorsystemene implanteres i kroppen må vi beskytte vår personlige kritiske infrastruktur!

Hva kan gå galt?

Mulige konsekvenser

- Pasientinformasjon på avveie
- Tømming av batteri
- Feiltilstander og feilkonfigurasjon
- Livstruende feilbehandling
- Trusler og utpressing

Utfordringer for sikkerhet i medisinsk utstyr

- Proprietære løsninger uten velkjente og standardiserte protokoller
- Leverandør krever hull i brannmur for fjerntilgang
- Standard eller hardkodede passord, dårlig nøkkeldåndtering
- Ikke implementert tilfredsstillende mekanismer eller rutiner for softwareoppdatering
- Det fysiske produktet har lang levetid og blir hengende etter i forhold til nye sikkerhetsmekanismer og utviklingen i trusselbildet
- Produkter som tradisjonelt har fungert i lukkede miljø kobles på nett
- Mangelfull regulering og lovverk
- Lav bruker- og bestillerkompetanse

Man kan ikke alltid stole på utstyrleverandøren...

Guidant to pay a fine of \$296M

The Arden Hills-based firm was charged with misleading federal safety regulators.

By **Janet Moore** Star Tribune | JANUARY 12, 2011 — 9:26PM

In what is believed to be the largest criminal penalty ever imposed in a medical device case, a federal judge on Wednesday approved an agreement calling for Guidant Corp. to pay \$296 million for concealing safety information about several of its heart devices.

Hva skjer med min pasientdata i skyen?

Life of our patients is at stake - I am desperately asking you to contact

Posted by: md76040303317

This question is **answered**. Helpful answers available: **2**. Correct answers available: **1**.

Sorry, I could not get through in any other way

We are a monitoring company and are monitoring hundreds of cardiac patients at home.
We were unable to see their ECG signals since 21st of April

Could you please contact us?

Our account number is: 9252-9100-7360

Our servers IDs:

i-bb5c0fd0

i-8e6163e5

i-6589720f

Or please let me know how can I contact you more directly.

Thank you

- Insulinpumper (Jay Radcliffe)
- Medisinpumper (Billy Rios)

Første eksempel på tilbaketrekking pga cybersikkerhet

The screenshot shows the official website of the U.S. Food and Drug Administration (FDA). The header includes the U.S. Department of Health and Human Services logo, the FDA logo with the text "U.S. Food and Drug Administration Protecting and Promoting Your Health", and navigation links for "A to Z Index", "Follow FDA", and "En Español". A search bar is also present. The main menu at the top includes "Home", "Food", "Drugs", "Medical Devices", "Radiation-Emitting Products", "Vaccines, Blood & Biologics", "Animal & Veterinary", "Cosmetics", and "Tobacco Products". Below the menu, the "Medical Devices" section is selected. A breadcrumb trail indicates the page path: "Home > Medical Devices > Medical Device Safety > Safety Communications". On the left, a sidebar under "Safety Communications" lists "Information About Heparin" and "Preventing Tubing and Luer Misconnections". The main content area features a large title: "Cybersecurity Vulnerabilities of Hospira Symbiq Infusion System: FDA Safety Communication". Below the title are social sharing icons for Facebook, Twitter, LinkedIn, Pinterest, Email, and Print. The "Date Issued" is listed as July 31, 2015. The "Audience" is described as health care facilities using the Hospira Symbiq Infusion System. The "Device" mentioned is the Symbiq Infusion System, Version 3.13 and prior versions.

Cybersecurity Vulnerabilities of Hospira Symbiq Infusion System: FDA Safety Communication

Date Issued: July 31, 2015

Audience: Health care facilities using the Hospira Symbiq Infusion System

Device: Symbiq Infusion System, Version 3.13 and prior versions

Postmarket Management of Cybersecurity in Medical Devices

Draft Guidance for Industry and Food and Drug Administration Staff

DRAFT GUIDANCE

This guidance document is being distributed for comment purposes only.

Document issued on: January 22, 2016

Hvordan få bedre sikkerhet?

- **Cybersafety-by-design:** Sikkerhet i programvareutviklingsløpet for medisinsk utstyr hos produsenter og i hele leverandørkjeden
- **Bevissikring:** Bevissikring og logging vil kunne brukes i hendelseshåndtering og etterforskning i etterkant av en hendelse der medisinske implantat kan ha blitt utsatt for cyberangrep
- **Testing:** Metodikk og rammeverk for tredjeparts testing
- **Patching:** Løsninger for rask og sikker patching av sårbarheter og sikkerhetshull i medisinske implantat
- **Resilience:** Hvordan sørge for at komponenter i det medisinske implantatet fortsetter å levere kritisk pasientbehandling også under feiltilstander eller forsøk på angrep

I Am The Cavalry

The Cavalry isn't coming... It falls to us

Problem Statement

Our society is adopting connected technology *faster than we are able to secure it.*

Mission Statement

To ensure connected technologies with the potential to impact public safety and human life are *worthy of our trust.*

Konklusjon

Vår avhengighet av systemer som styres av programvare øker raskere enn vår evne til å sikre systemene

- Utstyrsprodusenter må bygge inn sikkerhet i produktene
- Brukere må gjøre egne risikoanalyser og følge med på utviklingen i risikobildet
- Vi må innse at det vil gå galt, og planlegge for dette
- Mer uavhengig forskning og tredjeparts testing trengs
- Standardisering, ansvarsavklaring og bedre lovregulering
