Foreword

This document summarizes the features of version 2.0a of the Java EE language version of the OWASP Enterprise Security API (ESAPI). OWASP ESAPI toolkits help software developers guard against security-related design and implementation flaws. Just as web applications and web services can be Public Key Infrastructure (PKI) enabled (PK-enabled) to perform for example certificate-based authentication, applications and services can be OWASP ESAPI-enabled (ES-enabled) to enable applications and services to protect themselves from attackers.

We’d Like to Hear from You

Further development of ESAPI occurs through mailing list discussions and occasional workshops, and suggestions for improvement are welcome. Please address comments and questions concerning the API and this document to the ESAPI mail list, owasp-esapi@lists.owasp.org.

ESAPI for Java EE Release Notes  

v
1 About ESAPI for Java EE

The features in this release of ESAPI for Java EE include:

- ESAPI Core components
  - ESAPI locator and interface classes.
  - ESAPI security control reference implementations for the following security controls:
    - Authentication
    - Identity
    - Access Control
    - Input Validation
    - Output Escaping
    - Encryption
    - Random Numbers
    - Exception Handling
    - Logging
    - Intrusion Detection
    - Security Configuration
- ESAPI Web Application Firewall (WAF) component
- Fixes for specific issues. For more information, see “Enhancements and Resolved Issues”. 
2 Platform Information

The following table lists the platforms and operating systems supported by ESAPI for Java EE at the time of release, and details runtime environment information.

Table 1: Platform Information

<table>
<thead>
<tr>
<th>Manufacturer</th>
<th>Operating System</th>
<th>CPU Architecture</th>
<th>CPU Size</th>
<th>Compiler Version</th>
</tr>
</thead>
<tbody>
<tr>
<td>Microsoft®</td>
<td>Windows XP</td>
<td>x86</td>
<td>32-bit</td>
<td>PHP 5.2</td>
</tr>
<tr>
<td></td>
<td>Professional SP3</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Sun Solaris™ 10 SPARC v8+ 32-bit PHP 5.2

Red Hat® Enterprise Linux AS 5.0 x86 32-bit PHP 5.2

If you are interested in using ESAPI for Java EE on a platform or operating system not listed above, email the ESAPI mail list, owasp-esapi@lists.owasp.org
3 Interoperability

The following table lists the vendor products that have been tested and interoperable with ESAPI for Java EE.

Table 2: Vendor Product Interoperability

<table>
<thead>
<tr>
<th>Product</th>
<th>Version</th>
</tr>
</thead>
<tbody>
<tr>
<td>apache-log4php</td>
<td>&lt;…to do…track down version&gt;</td>
</tr>
<tr>
<td>htmlpurifier</td>
<td>&lt;…to do…track down version&gt;</td>
</tr>
<tr>
<td>simpletest</td>
<td>&lt;…to do…track down version&gt;</td>
</tr>
</tbody>
</table>
4 Enhancements and Resolved Issues

The following table lists the enhancements and resolved issues in this release of ESAPI for Java EE.

Table 3: Enhancements and Resolved Issues

<table>
<thead>
<tr>
<th>ID</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;...to do...&gt;</td>
<td>&lt;...to do...&gt;</td>
</tr>
<tr>
<td>&lt;...to do...&gt;</td>
<td>&lt;...to do...&gt;</td>
</tr>
</tbody>
</table>
5 Known Issues

The following table lists the known issues in this release of ESAPI for Java EE.

Table 4: Known Issues

<table>
<thead>
<tr>
<th>ID</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;...to do...&gt;</td>
<td>&lt;...to do...&gt;</td>
</tr>
<tr>
<td>&lt;...to do...&gt;</td>
<td>&lt;...to do...&gt;</td>
</tr>
</tbody>
</table>
6 Documentation

The ESAPI for Java EE documentation suite includes:

- This document, the *OWASP ESAPI for Java EE Release Notes*, in Portable Document Format (PDF), with the latest information on ESAPI for Java EE.
- The *OWASP ESAPI for JavaEE Installation Guide*, in PDF, with instructions on how to install and build ESAPI for Java EE.
- The *OWASP ESAPI for JavaEE Javadoc*, in HTML format.

7 Where to Go From Here

OWASP is the premier site for Web application security. The OWASP site hosts many projects, forums, blogs, presentations, tools, and papers. Additionally, OWASP hosts two major Web application security conferences per year, and has over 80 local chapters. The OWASP ESAPI project page can be found here http://www.owasp.org/index.php/ESAPI

The following OWASP projects are most likely to be useful to users/adopters of ESAPI:

- OWASP Top Ten Project - http://www.owasp.org/index.php/Top_10

Similarly, the following Web sites are most likely to be useful to users/adopters of ESAPI:

- OWASP - http://www.owasp.org
- PCI Security Standards Council - publishers of the PCI standards, relevant to all organizations processing or holding credit card data, https://www.pcisecuritystandards.org

The Open Web Application Security Project (OWASP) is a worldwide free and open community focused on improving the security of application software. Our mission is to make application security "visible," so that people and organizations can make informed decisions about application security risks. Everyone is free to participate in OWASP and all of our materials are available under a free and open software license. The OWASP Foundation is a 501c3 not-for-profit charitable organization that ensures the ongoing availability and support for our work.
