BREAKER’S CONCERNS

❌ VULNS!

🔥 Compromise!

👏🏼 LOL’s!
Let's get in the mood
“….developers will never learn, never improve because they are repeating the same mistakes over and over again”
“...only good at ranting. Zero contribs, and almost zero constructive feedbacks but bashing”
“If you are a developer and don’t know who OWASP is at this point, it’s because you’ve chosen not to.”
“Problem. Infosec pros, pentesters, etc. are more interested in #appsec than programmers. How to change that? < will not change”
“... the developer who did this should be taken out into the street and beaten ...”
“Agile: Most security guys are useless”
THE CLOUD MAKES ME SECURE
Customers Don’t Ask For Security
BREACHES are CHEAPER than SECURE CODING
Agile Hurts Security

Friday, October 26, 2012
Breakers

DON’T

understand

DEVELOPMENT
Builders NEED TO understand VULNERABILITIES
WAF + Rails SOLVES THE PROBLEM
FALSE POSITIVES ARE A NECESSARY EVIL
We don’t really feel this way...

Hard Stance
Opposite Thinking
Same Conclusion?
