Dear valued OWASP corporate member.

The Open Web Application Security Project (OWASP) is a worldwide free and open community focused on improving the security of application software. Our mission is to make application security "visible," so that people and organizations can make informed decisions about application security risks.

We would like to announce that from 4th to 7th November 2008, the OWASP EU Summit 2008 will take place in Algarve, Portugal. The OWASP Summit is a worldwide gathering of OWASP leaders and Key industry Players. The purpose of the summit is to present and discuss the latest OWASP tools and documentation projects, to use Working Sessions to improve collaboration and achieve specific goals and to decide roadmaps for OWASP projects, chapters and for OWASP itself.

The four-day event is split into a two-day conference, in which more than 40 OWASP specific presentations will be held, and two days of working sessions of open debate covering multiple projects and goals:

OWASP Strategic Planning	Winter Of Code 2009	Secure Code Review Guide v2.0
OWASP Top 10 2009	ESAPI Project	Testing Guide Version v4.0
Application Framework Security	Browser Security	OWASP Application Security Desk Reference (ASDR)

The summit shall also host a range of training courses (at additional cost) providing hands on experience to students in the areas such as Secure Application Development, Secure Code review, Application Penetration Testing, etc.....
