- The Open Web Application Security Project (OWASP) is a 501c3 not-for-profit also registered in Europe as a worldwide charitable organization focused on **improving the security of software.**
- **Our mission is to make application security visible**, so that people and organizations can **make informed** decisions about true application security risks.
- Everyone is welcomed to participate in OWASP and all of our materials are available **under free and open software licenses.**

# OWASP: The Open Web Application Security Project

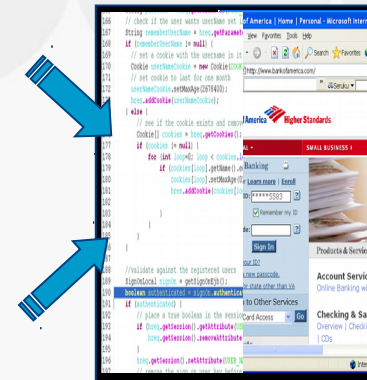

I would like to build secure software

I would like to find all the security bugs in my software

I would like to implement a Roadmap for Software Security
