Welcome | Starting a New Project | Project Assessments | Project Inventory | Marketing Materials | Terminology | Sponsorships and Donations | File Information | Contact Us

Welcome to the OWASP Global Projects Page

An OWASP project is a collection of related tasks that have a defined roadmap and team members. OWASP project leaders are responsible for defining the vision, roadmap, and tasks for the project. The project leader also promotes the project and builds the team. OWASP currently has over 148 active projects, and new project applications are submitted every week.

This is one of the most popular divisions of OWASP as it gives members an opportunity to freely test theories and ideas with the professional advice and support of the OWASP community. Every project has an associated mail list. You can view all the lists, examine their archives, and subscribe to any project by visiting the [OWASP Project Mailing Lists](#) page. A summary of recent project announcements is available on the OWASP Updates page.

Download the OWASP Projects Handbook 2013 :

OWASP Project Inventory

All OWASP tools, document, and code library projects are organized into the following categories:

- Incubator Projects:** OWASP Incubator projects represent the experimental playground where projects are still being fleshed out, ideas are still being proven, and development is still underway.
- Lab Projects:** OWASP Labs projects represent projects that have produced an OWASP reviewed deliverable of value.
- Flagship Projects:** The OWASP Flagship designation is given to projects that have demonstrated superior maturity, established quality, and strategic value to OWASP and application security as a whole.

Who Should Start an OWASP Project?

- Application Developers.
- Software Architects.
- Information Security Authors.
- Those who would like the support of a world wide professional community to develop or test an idea.
- Anyone wishing to take advantage of the professional body of knowledge OWASP has to offer.

Contact Us

If you have any questions, please do not hesitate to contact the OWASP Projects Manager, Samantha Groves by using the form provided here. Please allow five working days for your question or comment to be answered. This is due to the large amount of queries the foundation staff receive every day. We thank you for your patience.

Social Media

We recommend using the links below to find our official OWASP social media channels. These are a great way to keep in touch with the different initiatives going on at OWASP throughout the world. They are all updated regularly by chapter leaders, project leaders, the OWASP Board members, and our OWASP Staff. If you have any questions or concerns about any of these accounts, please drop us a line using our "Contact Us" form found above.

OWASP INITIATIVES

- What is this?
- How does this work?
- Why are we using this?
- Case Study: Project Support Volunteers
- Not just for Projects

NEXPOSE CASE STUDIES NEEDED

OWASP INITIATIVES
Strategic Global Focus Groups

Community Assistance Requested

Harish Chowdhary, Delhi Student Chapter Leader is writing a Book on NEXPOSE and his own experience on it and would like to include his/her case studies, projects and the book for open-source community. At least 25 case studies are needed.

OWASP GSD Project Support

OWASP PROJECTS
a global division

The OWASP GSD Project is currently in need of a project support person to handle administrative duties. This person will be responsible for updating the project spending, providing updates to relevant stakeholders and managing the administration needs of the project.

Please submit your application if you are interested in helping with the project.
