Hi!

As you may have noticed, I sent you an email from your account.
This means that I have full access to your account.

I've been watching you for a few months now.
The fact is that you were infected with malware through an adult site that you visited.

If you are not familiar with this, I will explain.
Trojan Virus gives me full access and control over a computer or other device.
This means that I can see everything on your screen, turn on the camera and microphone, but you do not know about it.

I also have access to all your contacts and all your correspondence.

Why your antivirus did not detect malware?
Answer: My malware uses the driver, I update its signatures every 4 hours so that your antivirus is silent.

I made a video showing how you satisfy yourself in the left half of the screen, and in the right half you see the video that you watched.
With one click of the mouse, I can send this video to all your emails and contacts on social networks.
I can also post access to all your e-mail correspondence and messengers that you use.

If you want to prevent this,
transfer the amount of \$753 to my bitcoin address (if you do not know how to do this, write to Google: "Buy Bitcoin").

My bitcoin address (BTC Wallet) is: 1GoWy5yMzh3XXBiYxLU9tKCBMgibpznGio

After receiving the payment, I will delete the video and you will never hear me again.
I give you 48 hours to pay.
I have a notice reading this letter, and the timer will work when you see this letter.

Filing a complaint somewhere does not make sense because this email cannot be tracked like my bitcoin address.
I do not make any mistakes.

If I find that you have shared this message with someone else, the video will be immediately distributed.

Best regards!

Hello!

I have very bad news for you.

21/10/2018 - on this day I hacked your OS and got full access to your account owasp-geneva at lists.owasp.org

So, you can change the password, yes... But my malware intercepts it every time.

How I made it:

In the software of the router, through which you went online, was a vulnerability.

I just hacked this router and placed my malicious code on it.

When you went online, my trojan was installed on the OS of your device.

After that, I made a full dump of your disk (I have all your address book, history of viewing sites, all files, phone numbers and addresses of all your contacts).

A month ago, I wanted to lock your device and ask for a not big amount of btc to unlock.

But I looked at the sites that you regularly visit, and I was shocked by what I saw!!!

I'm talk you about sites for adults.

I want to say - you are a BIG pervert. Your fantasy is shifted far away from the normal course!

And I got an idea....

I made a screenshot of the adult sites where you have fun (do you understand what it is about, huh?).

After that, I made a screenshot of your joys (using the camera of your device) and glued them together.

Turned out amazing! You are so spectacular!

I'm know that you would not like to show these screenshots to your friends, relatives or colleagues.

I think \$719 is a very, very small amount for my silence.

Besides, I have been spying on you for so long, having spent a lot of time!

Pay ONLY in Bitcoins!

My BTC wallet: 1H1K8MfLEJgJCCfDEkTJmv9GjD3XzEFGR

You do not know how to use bitcoins?

Enter a query in any search engine: "how to replenish btc wallet".

It's extremely easy

For this payment I give you two days (48 hours).

As soon as this letter is opened, the timer will work.

After payment, my virus and dirty screenshots with your enjoys will be self-destruct automatically.

If I do not receive from you the specified amount, then your device will be locked, and all your contacts will receive a screenshots with your "enjoys".

I hope you understand your situation.

- Do not try to find and destroy my virus! (All your data, files and screenshots is already uploaded to a remote server)

- Do not try to contact me (this is not feasible. I sent you an email from your account)
