### **TECHNICAL SKILLS**

- Operating Systems:** Linux, FreeBSD, Microsoft Windows (all desktop and server versions.)
- Network/Security:** Most major protocols, 802.11x, and numerous open-source and commercial security tools/applications.
- Firewall:** Checkpoint (R54 through R71), Netopia, and pf.
- Intrusion Detection:** Sourcefire, AirTight Networks, Snort, Tripwire, OSSEC-HIDS, and other open source and commercial applications.
- Clearances Held:** Confidential, Secret, and Top Secret (DoD)

### **EXPERIENCE:**

2007 – Present                      **Financial Services, Inc.**  
*Senior Security Engineer*

- Responsible for all network-related security functions in the enterprise.
- Established, manage, and maintain a Managed Security Services program, implementing IDS, wireless IPS, and security reporting services for client banks and credit unions.
- Replaced the aging Nokia firewall with new Checkpoint high availability UTM appliances.
- Mitigated all Federal and third-party audit issues, which had never been done previously.
- Implemented numerous tracking databases for security incidents, scan data, and audit issues.
- Implemented and manage IDS, wireless IPS, security auditing, and centralized logging and reporting services for the enterprise.

2001 – 2008                      **North Jersey Computer Services / Penguin Netwerx, LLC**  
*Principal Consultant/Owner*

- Built and deployed Network Intrusion Detection Systems to financial institutions in the northern NJ and NYC area.
- Deployed and maintained one of the largest Nitix installations in the US.
- Deployed and maintained firewalls, NIDS/HIDS, secure wireless, proxy servers, secure web, mail, and FTP servers to small and mid-sized businesses in the NYC Metro area.
- Performed security assessments, audits, and mitigation services.

2001 – 2002                      **Novadigm, Inc.**  
*Radia Administrator*

- Incorporated the company-wide use of MD5 hashing for all software deployments.
- Provided the first Linux client/server implementation for Radia in the Support group.
- Worked extensively with developers and Quality Assurance on security issues surrounding current exploits for Linux and Windows systems to ensure secure communications between the Radia client and server.
- Provided Radia client and server support to Fortune 500 companies.
