GHANA CYBERSECURITY

OPEN WEB APPLICATION SECURITY PROJECT

September 5th & 6th 2013, British Council, Accra

Ghana CyberSecurity aims to be the premier and marquee Information Security and Assurance event in Ghana and Africa from the OWASP Ghana Chapter

Top security practitioners from around the world converge to share the latest application security research, case studies and practices

If you're an executive, policy maker, manager, auditor, technical leader, analyst, engineers, student…

you need to be there!

Why?

OWASP GHANA

Universities hardly teach security as part of Information Technology or Computer Science curriculum.

Studies shows that only a few students are enrolled at schools that teach secure development and practices.

- Value: Competitive and lower pricing.
- Live Training With Hands-On Bootcamp: Same courseware as APPSEC conferences, with Bootcamp hours to reinforce learning.
- Your Instructor: OWASP Instructors are real world practitioners with years of experience.
- Networking: You will get to know your InfoSec peers and can collaborate long after the training.
- Online tools: Access to free resources and audio files.
- Smaller class sizes: You get more one-on-one time with your instructor so you can master course material.
- Certification: You get a certificate at the end of your training demonstrating you have the technical skills needed to meet their security responsibilities.
- Standard: Many private companies and government agencies now require new job candidates to have knowledge of OWASP.
