

## VICNUM

- Based on a game played to kill time
- Hopefully fun and educational
- A flexible lightweight web application useful to auditor's honing their web app security skills
- Easy to install, easy to grasp
- Easy to modify
  - ▶ Can be used to test out new hacks and new defenses
  - ▶ Can be used to test whether a Web VA can detect a vulnerability
  - ▶ Or whether a Web firewall can protect a vulnerability
  - ▶ Can be tailored to address different auditor skill sets
  - ▶ Can be tailored to accommodate different levels of 'capture the flag' exercises
