Jonathan Marcil	14-Sep	Yes	<p>I won't list specific modifications, as I believe the whole page needs a complete overhaul, but from what we used to have these are missing:</p> <p>Presentation backgrounds in 4:3 and 16:9 formats</p> <p>PNG icons with transparent background</p> <p>Social Media kit (used to be one by site, but we can now make a generic one in high resolution)</p> <p>Brand references sheet with colors for printing</p> <p>Easy files to print stickers, banners and business cards (plus what is planned on the page like flyers)</p> <p>This one is updated in 2020 by the community and myself on <a href="https://github.com/OWASP/owasp-swag/tree/master/owasp">https://github.com/OWASP/owasp-swag/tree/master/owasp</a></p>			Rejected. Not part of policy, will develop a kit of assets
Jonathan Marcil	14-Sep	Yes	<p>I can't stress enough the fact that OWASP has a recognizable brand that is diverse with the wasp being the defining emblem. I'm glad we have a minimalist brand like presented on the page, but we also need something with colors. We used to have 3 different powerpoints in colors!</p> <p>Additionally I'd like to add the need for:</p> <p>16:9 backgrounds or wallpapers to be used in live streaming</p>			Rejected. Not part of policy, will develop a kit of assets
